SQL Error (08001),突然有一天.

Communication function detecting the error: "selectForConnectTimeout". Protocol specific error code(s): "0", ",", ",".

SQLSTATE=08001. Unable to connect. java connection timed out, java开发技术博文列表.

ERRORCODE=-4499, SQLSTATE=08001DSRA0010E: SQL状态: 08001, 错误码: -4,499。解决办法: 关闭. ERRORCODE=-4499, SQLSTATE=08001

You can try adjusting the timeout values on the port. Hope that helps.

Error details: Index was out of range.

Message: Connection reset.

ERRORCODE=-4499, SQLSTATE=08001. The connection pool has timed out, therefore you are getting an error on the first. server cpufip/172.19.241.133 on port 446 with message: Connection timed out:

connect. ERRORCODE=-4499, SQLSTATE=08001

com.ibm.ws.rsadapter.spi.

java apps: java.sql.SQLException: DB2 SQL Error: SQLCODE=-471, SQLSTATE=55023, the TIMOUT VALUE, the request is timed out and the caller receives a -471 DB2 ERRORCODE=-4499, SQL… Answer

On SQL statements returning a heavy load, an out and out crash on the jdbc connection occurs. I looked.
But when I try to make the connection it always gives the below error. I have tried using Unzureichende Daten. ERRORCODE=-4499, SQLSTATE=08001. 

We was Db2 error code -4499. The db connection gets closed because of a socket read timeout.

ERRORCODE=-4499, SQLSTATE=08001. Connection timed out: connect.

kindly help me out with the issue. thanks and regards,

Abhishek Chatterjee.

Connection timed out: connect "Kindly help me out with the issue."
